(JMIR Med Educ 2023;9:e46366) doi: 10.2196/46366

In “Personalized Precision Medicine for Health Care Professionals: Development of a Competency Framework” (JMIR Med Educ 2023;9:e43656), the authors noted several errors.

In the originally published paper, a typographical error in the corresponding author’s email address, formatted as:

fmartin@isciiI.es

This has been changed to:

fmartin@isciii.es

The addition of this citation modified the order of the rest of the citations.

In Table 2, an acronym was originally typed incorrectly as “OLPDPGDR”. This has been corrected to “OLPDPGDR” both in row “D2.11” and in the corresponding footnote “c”. The same error occurred in Figure 4, which has also been updated accordingly.

An error was also noted in the first paragraph of the “Acknowledgments” section. The sentence:

We are grateful to the working group for aiding the development of this project, contributing to the preparation of this document, and sharing their perspectives on the key elements and training needs for the definition of competencies in the areas of interest of personalized precision medicine.

Has been changed to:

We are grateful to the Fundación Instituto Roche and the working group for aiding the development of this project, and sharing their perspectives on the key elements and training needs for the definition of competencies in the areas of interest of personalized precision medicine.

The citation added to the reference list is as follows:

made after submission to full-text repositories, the corrected article has also been resubmitted to those repositories.
